Strategic Goals

Knowledge

Promote the role of the Oncology Nurse Navigator as it relates to the patient navigation process

Leadership

Promote leadership opportunities

Quality

Promote evidence-based research and effective practices to support the role of the Oncology Nurse Navigator

Technology

Expand and improve NN SIG communication via NN Virtual Community

Workgroups Goals

Quality/Outcome Measures

To investigate the feasibility of standardized NN program metrics and then thereafter explore opportunities to establish national benchmarks for patient experience, clinical outcomes and business performance.

Navigation Resource Tool Kit

To investigate and create a tool kit that will be of value to oncology nurse navigators and not duplicate what another organization has done.

Lay Patient Navigation

To establish guidelines for role delineation between the ONN and the nonprofessional lay patient navigator.

Cancer Care Coordination

To explore differences and similarities between ONN and CCC in order to define the needs, goals and accomplishments.
